BOOK SYNOPSIS

Landscape Irrigation Design provides information and approaches to assist the successful irrigation designer. Beginning with basic concepts, the text discusses the soil, plants, water and their interactions, sprinkler selection and spacing, water supply and distribution, controllers, electrical wiring, pumps and pump selection, and drip irrigation and ends with completed irrigation designs. Although the focus is on residential irrigation design, larger designs such as golf courses are also discussed. Careful presentation of a wealth of resource material allows this work to serve as both an introductory text as well as an independent learning aid and makes Landscape Irrigation Design a valuable reference for first and subsequent design projects.
